Subject: 2005 SCDL contingency question

01/21/11

SCDL applicants,

It has come to my attention that some applicants would be better served to have a 5 year fiscal review period for the purpose of determining their forgiveness from the 2005 SCDL loan, rather than a 3 year period. In an effort to determine if this legislative effort is beneficial to pursue, I am trying to determine if this is a common situation or an anomaly among LA applicants. At a glance, it seems that a 3 year review period would best serve the majority of applicants. This time period should reflect disaster-related budget shortfalls before the recovery has an opportunity to show in fiscal review. I'm sending this request to a sample of SCDL applicants asking that they review and compare the 3 year vs. 5 year review against the pre-disaster operating budget extrapolated during the eligibility analysis. Please respond with a simple, 3 year or 5 year recommendation. The results gathered from this exercise will determine how we move forward; either expanding the survey to the rest of LA applicants and possibly pursuing legislative action to expand the fiscal review period, or leaving the review period at 3 years uncontested.

Assuming all applicants are benefitted by the expansion to 5 years, there is still no guarantee that legislative action can be passed to change the current forgiveness regulations that are in the approval stages awaiting public release. Currently, this is simply an academic exercise and we appreciate your participation.

Sincerely,

James M. Clark
Problem Resolution Officer

Paul, while speaking to Senator Martiny apparently there is some interest on the part of the administration to identify funding for the building completion.

Knowing of the numerous funding request can you share the possibilities of identifying funds and the process necessary to obtain, as I know JP is developing a strategy to borrow, bond or other alternatives to complete the project

As always thanks Paul

Tim

Risk is more than willing to handle any claims related to insurance however the current proposed process is more disjointed than it originally was and lacks the single focus point that it was my understanding that you were attempting to establish.

Originally when the Recovery section was establish back in the late 1990's Tim Valinti was the single focal point for all subrogation as a result of 3rd parties. All claim recoveries went through him whether it was a private citizen or an insurance carrier. Risk feed him any issues that came to our attention as well as the departments. He would write a demand letter and if no recovery was forth coming would file suit.

Under the proposed policy they would have Risk Management handling those issue with insurance companies and negotiate settlements for the damages. I have real concerns whether I have that authority under the charter. There is no question the parish attorneys office does as it is authorized to bring suit and settle law suits and claims.

Again I am perfectly will to handle the matter any way you wish within the abilities of my existing personnel however we will not have the single focal point that you want and that use to exist

Cherreen,

The damage recovery process prepared by Gregory Giangrosso followed the directive he received from Mr. Whitmer. The CAO's office specifically requested that the Risk Management Department be responsive for recovery when insurance is involved and a claim can be made for the loss. Therefore, section II, titled File Insurance Claim will not be deleted from the property loss policy.

If you have any questions please call me directly.

Thanks,

Peggy Barton

Subject: Permanent pump station features

Ladies & gents,

I understand the Friday meeting to determine the list of future features for the permanent pump stations went quite well. I hope the Corps assents to all of your wishes.

For your consideration, I was wondering if you might review a few other features I came up

01/21/11

with?

30. Generators to be placed inside their own building
31. Positive backflow protection - at least two means, per USACE EM 1110-2-3105 for "through the protection" pumping.
32. Extra protection against oil spills
33. Local input and review of Spill Prevention, Control, and Countermeasure (SPCC) and Stormwater Pollution Prevention Plan (SWPPP) for both construction and operation
34. All agreed-upon "option neutral" features to be included in USACE Phase 1 and Phase 2 Requests for Proposals
35. Include backup cooling water system (well water) in case of power outage or mechanical failure (likely already covered under #14)
36. Pump stations to have **installed** pump capacities to match future S&WB pumping needs (17th St installed pumps: 12,500 cfs, Orleans Ave: 3390 cfs, London Ave: 8980 cfs)
37. Pump station support systems to be sized for Option 2.

Of these, I would say that #34 is the most important. That's because the Phase I RFP has been circulating for comment since March. As soon as the Corps gets the PPA signed, they're likely going to send that RFP out as it is - i.e. not reflecting any of this.

At that point, the PPA may become useless, because the potential contractors have not been contractually bound to follow the PPA.

I believe the Corps WILL do this if a clause is not in the PPA directing them to include the features in any RFP.

I've included a spreadsheet with more detail on these features. Please feel free to comment.

Best regards,

Matt McBride

Subject: History Channel / Looking for Leads

Hi,

I am writing with regards to a show we are making for the History Channel. I contacted the film office of New Orleans and they suggested that I contact you. We are currently shooting a new 10 part show for the History Channel and will be filming in your area hopefully very soon. I am urgently looking for leads in and around New Orleans.

Below I have a blurb of what we are looking for. It would be great if you could please forward this to all your staff members and even any friends or family that you think could tip us off. Any leads would be welcome! We're under a tight deadline so I'd love to hear of any suggestions as soon as possible. Anyone that's really in touch with the local community may know of someone that fits the bill.

Here is the blurb of what we are looking for;

The History Channel is making a brand new show on 'antique picking'. The 10 part series entitled 'American Pickers' is airing in January and is being produced by Cineflix Inc. The show follows two 'pickers' on a road trip around the US. Our 'pickers' Mike & Frank make a living from buying other people's old 'junk'. They travel around the country visiting people off the beaten path who have barns/junkyards/warehouses/properties full of old stuff that's been building up for years. We're looking for people with amazing accumulations that they have perhaps hoarded for years or maybe stuff has been passed down through the generations. The kind of stuff the guys are interested in buying are old motorcycles, old car parts, old 'Americana' type items like gas pumps, gas station signs, license plates – old kind of funky vintage memorabilia. There is no limit to the type of things the guys are willing to strike a deal on but we are trying to steer clear of 'antiques' in the classic sense like china plates, glass-ware or ornaments – it's more the "Americana" / popular culture stuff they go for. We're NOT looking for any shop/flea market/museum scenario – no organized collections with anything on display! (unless it's a person who has a museum and then their own private surplus

accumulation of stuff). We're looking for piles of stuff (the messier, rustier and 'junkier' the better!). We're ideally looking for great/eccentric local characters with good stories to tell that have this kind of scenario. As there is a lot of history in the South we're hoping to shoot in New Orleans/LA soon – I'm sure there are some great local characters with amazing lives and stories.

Please contact me asap if you know of anyone that may be right for the show. Perhaps it's a family friend, a neighbor or simply someone that you've driven past and noticed barns/buildings/a yard full of stuff. Any leads would be much appreciated.

Thanks so much for your time!

Kindest regards

Annie MacKinnon

Subject:

I need your help with the Grant funding.

We met with Marnie on Oct 12th to make sure all was working smoothly and the info needed for project payments was in the Parish systems. These funds are a direct deposit when requested by the Parish so there is no need for a reimbursement using Parish dollars.

We are doing all of the reporting but the Parish has to draw down the funds directly. I have even offered to have my person go to their offices and do the data entry so that they are not burdened with the process.

At that meeting we gave Michelle in Marnie's office the Pre Award invoice that has been approved by the DOE to be paid with grant funds No Parish funds required.

I have sent several emails and calls to get the status. Early this week Michelle in Marnie's office told us that someone named Jay in Finance has a problem with the language and cap on my JP Contact.

The way the resolution caption reads is a cap of \$100,000 which is for JP funds. The actual contract has language that allows my firm to administer and implement any grant we secure for the amount of money authorized in the grant .

Supposedly they need a notice to proceed as well. and are now telling us they sent something to Aaron's office , I have no idea what or why

I would ask that we set a meeting to get this straight now , since no one has actually contacted me to discuss any issues to date. If we need to make changes lets get it done .

We have worked on this grant for months and have gotten the funding approved and are

just looking to now get paid and pay subs in accord with approved grant

Suggestions??? It seems to be moving from desk to desk but when there is a question , it sits .I know Marnie is very busy and has been very helpful in the process but I think this will require direction from your office to get it resolved in Finance

Let me know when we can get together to get this resolved

Thanks

Charlotte

For the record this gentlemen is a chronic hostile complainer. Obviously he left me off his original email because I had enough of his rants over the last few years.

I told him his best bet was to move to a neighboring parish that doesn't do roadwork. If he enjoys potholes and busted up streets I can make a fine recommendation.

Please note that your e-mail below was forwarded to me for an appropriate response. Following is my response to your concerns:

There are a series of roadway and drainage related improvements currently under construction along major thoroughfares throughout the Westbank of Jefferson Parish. These projects are being financed primarily with Federal and State funds. Construction schedules for these types of projects are **often** dictated by availability of funds.

Over the years Jefferson Parish has been very proactive and aggressive in securing Federal/State funds for numerous much needed Public Works Projects throughout the Parish. These funds must be spent in accordance with State and Federal guidelines and regulations. Consequently, when funds are appropriated, the Parish must act promptly or run the risk of losing the allocated funds. Securing Federal and State funding is an important factor in the Parish's ability to finance a number of projects throughout the Parish. Parish would be hard pressed to finance costly projects strictly with local funds.

Proper maintenance and upgrading of our existing roadway network and drainage infrastructure is vital to keeping Jefferson Parish at the forefront of promoting both economic opportunities and superior quality of life to its residents. Failure to act promptly on needed maintenance related work on major thoroughfares can generate **very costly** repair work at a later date.

Following is information on some of the ongoing work on major thoroughfares in the general vicinity of Gretna, Harvey, Marrero and Terrytown.

I **LAPALCO BOULEVARD RESURFACING (MURPHY CANAL TO BROOKLYN AVENUE) - EAST-WEST ROADWAY**

- i Project calls for the cold-mill and overlay of referenced section of roadway. It includes miscellaneous curb and guardrail improvements. This is Phase 5 of a 6 Phase project covering the area from Belle Chasse Hwy. to Murphy Canal.
- i **Construction Start Date:** July 30, 2009
- i **Expected Construction Completion:** End of November 2009 for the roadway - Dec/Jan for guardrail related work
- i **Construction Cost:** \$1,900,000
- i **Funding Source:** Project is being financed with 80% Federal funds and a 20% local match.

The scope of work associated with this project requires that a minimum of 1-2 lanes be always opened to thru traffic while construction is under way. To expedite project and minimize impact to motorists, a substantial amount of work has been allowed to take place at night.

I **DRAINAGE IMPROVEMENTS ALONG TERRY PARKWAY (HARVARD AVE. TO GUARDIAN AVE.) - NORTH-SOUTH ROADWAY**

- i Project calls for canal drainage improvements along this stretch of roadway. This is phase two (2) of a multi-phase project that is being financed with State funds (as funding becomes available).
- i **Construction Start Date:** July, 2009
- i **Expected Construction Completion:** Jan/Feb, 2010
- i **Construction Cost:** \$2.5M
- i **Funding Source:** 100% State funds under the Capital Outlay Program.

The scope of work associated with this project requires that one (1) lane of Terry Parkway (in each direction) be closed to traffic while construction takes place in the canal, immediately adjacent to the roadway.

I **HARVEY BOULEVARD IMPROVEMENTS (WALL BLVD. TO ENGINEERS ROAD) - EAST-WEST ROADWAY**

- i Project calls for the construction of a **new** four (4) lane divided roadway with drainage, bridge, traffic signal improvements, **etc...** This is Phase 1 of a multi-phase project between Peters Road and Engineers Road.
- i **Construction Start Date:** January 6, 2009
- i **Expected Construction Completion:** June, 2010
- i **Construction Cost:** \$13.5M
- i **Funding Source:** Project is being financed with 80% Federal funds and a 20% local match.

With regards to the location of traffic signals at the intersection of Wall Blvd./Harvey Blvd., please note that a total of eight (8) mast arms will be located in the median areas of Wall and Harvey Blvds. These traffic signals will handle North-South as well as East-West traffic.

This project will provide another important East-West major thoroughfare on the Westbank of Jefferson Parish.

! **LAPALCO BOULEVARD BRIDGE OVER THE HARVEY CANAL - EAST-WEST ROADWAY**

Bridge is currently being repaired as a result of an incident that occurred on Tuesday, November 10, 2009, whereas a barge carrying a crane collided with the bridge structure causing structural damage. Repair work requires that one (1) lane of Lapalco Blvd. westbound be closed to thru-traffic. One lane of eastbound Lapalco Blvd. is currently closed to traffic on the account of needed guardrail related work along the median of Lapalco, immediately east of the Harvey Canal. Bridge repair work is expected to be completed within the next 2-4 weeks. However, there is a possibility that both westbound lanes (on the bridge) could be opened to traffic within 1-2 weeks. Guardrail related work should be completed by Dec/Jan. Most of the upcoming guardrail work is to be performed during off-peak hours.

ASPHALT VS. CONCRETE PAVEMENT (FLEXIBLE VS. RIGID)

With regards to life expectancy of concrete vs. asphalt roadway, it must be said that **under ideal conditions** a well designed concrete roadway has a tendency to be more durable than an asphalt roadway. However, it must also be said that under certain conditions, an asphalt roadway could prove to be more desirable/beneficial. In selecting the type of material to be used on a roadway project, a number of factors must be taken into consideration. These include, but are not limited to the following:

- ! **Cost.** Concrete roadways are generally more costly than asphalt roadways.
- ! **Soil Conditions.** Poor soil conditions can generate a significant amount of differential settlement. Asphalt roadways normally perform better than concrete roadways in areas where soil conditions are poor.
- ! **Maintenance.** Asphalt roadways are easier and less costly to maintain than concrete roadways. Furthermore, maintenance of asphalt roadways require less time than concrete roadways. This can be significant in the closing and opening of lanes to thru traffic.

The decision to resurface the ongoing work on Lapalco Blvd. with asphalt was a proper/correct decision. Reconstruction of this section of roadway with concrete would have been very costly and disruptive from a construction time point of view.

In conclusion, our Public Works Department makes every effort to coordinate all projects in order to minimize inconvenience to the traveling public and local businesses. However, it must be understood that traffic congestion and delays are generally an unavoidable byproduct of the construction process. It is also important to know that the completed projects will provide safer roadways and greater traffic capacity (in some instances), which in turn allow for the continued economic growth of the community. Please note that we fully comprehend that these construction projects are creating a temporary inconvenience to the general motorists, but rest assured that we are doing everything possible to expedite their completion.

I hope that I have answered all of your concerns. If I can be of further assistance please advise.

Subject: Traffic Madness

What's going on with the traffic on the west bank...???? It took me an hour to get from Gretna to Marrero.

Why are all the streets being worked on at the same time ????. Why are the lanes closed on Lapalco Blvd and no work is being done ????. Emergency vehicles are stuck in traffic with no where to go....

Why does the Parish use asphalt to pave the roads instead of cement which lasts 10 times longer ????. Lapalco roadwork never seems to end.

When will Terry parkway road construction be completed????

I live in the Shadowlake subdivision and am trapped in my subdivision with the traffic on Wall & Harvey Blvd. Its hard to get in & out of this subdivision..... With this Harvey Blvd extension fixing to open up, Where will the traffic lights on Wall & Harvey Blvd be located ??????

I hope this Harvey Blvd project doesn't turn in to another Manhattan Blvd, Lapalco Blvd, and elevated expressway nightmare.....Ever see the traffic trying to exit at Barataria blvd ??? Traffic is backed up for miles.

People are running red lights and going up one way streets, We witnessed this yesterday. The traffic is affecting drivers mentally.....

Now you have the "Money Grab" going on with the speed camera vehicles in Gretna and Westwego being used on "State Highways" I wonder if this is legal.....

Traffic control has failed at all levels in Jefferson Parish.....

Thanx for letting me get this off my mind....(As I was stuck in Traffic).....

.....RJG.....

Jefferson Parish internal inquiry into insurance deal kept secret

By [Richard Rainey, The Times-Picayune](#)

November 12, 2009, 10:52AM

Assistant Jefferson Parish Attorney Louis Gruntz has concluded the internal investigation of Tim Whitmer, the parish government's chief administrative officer now under scrutiny because his company was making commissions off an insurance contract at West Jefferson Medical Center.

But according to an e-mail to the [Parish Council](#), council members are the only ones permitted to see the results. Gruntz advised the council today to keep his report from the public, saying it doesn't qualify as a document for general release.

"I advise that the press not be given a copy of the report and that the only comment should be to refer to R.S. 42:1161 which mandates that the report be 'CONFIDENTIAL,'" his e-mail reads.

The council is tasked with reviewing Gruntz's findings and deciding whether to file an official report with the Louisiana Board of Ethics. Whitmer already has asked the board for a ruling on the relationship between his business, [Lagniappe Industries](#), and the Marrero hospital.

Gruntz took over the administration's inquiry after Parish President [Aaron Broussard](#) and Parish Attorney Tom Wilkinson [recused themselves](#) from investigating Whitmer. Broussard said he had done legal work for Lagniappe Industries. Wilkinson said Whitmer's wife, Dawn, co-owner of the company, was the acting insurance agent on two properties that Wilkinson partly owns and he is the attorney in charge of the estate of Tim Whitmer's late parents.

Earlier this month, The Times-Picayune disclosed that Lagniappe was [secretly splitting](#) hospital insurance commissions with Wally Pontiff Sr., a broker with B&A Insurance Agency. Pontiff's contract with the hospital forbade him to split commissions with outside brokers. The hospital's board of directors recommended Monday that the Parish Council cancel the contract.

.....

Richard Rainey can be reached at rrainey@timespicayune.com or 504.883.7052.

Thanks,

Dawn Whitmer
